Water Weighs Exhibition in Cosenza

On 20th of December, **Water Weighs** exhibition opened its doors in Italy, at the BoCs Museum in Cosenza, the same city that hosted the Artistic Residency last June 2021.

Corporalità sommerse (submerged corporalities), a homage to the different approaches that each artistic team use to explore the project theme: the sea, the Mediterranean Sea, its mystery, its power and, also, its tragedy.

The exhibition will stay open to the public until April 2022, from Tuesday to Saturday, from 10.00 to 13.00 and from 15.00 to 19.00, with the possibility of a free guided tour.

Until now, a very positive reaction has come from the visitors, commenting that it is an original show for the city of Cosenza.

How about dry diving to a World War II wreck?

#Phalasarna1941 is an experimental application exploring Augmented Reality (AR) storytelling in the context of cultural heritage.

The application was developed by the University of Oslo – Department of Media and Communication under Marebox project. The application features a “dry dive” to the World War II TLC wreck and a reconstruction of how it was attacked by German bombers during the Battle of Crete in May 1941.
